

# KRUSHAL KHUNT

+91 9725119093 | krushalkhunt12@gmail.com

## Objective

Seeking an internship opportunity to apply my learning, build real-world skills, and contribute with honesty and hard work. I aim to grow by working on practical tasks and learning from experienced professionals.

## Education

• <b>OM institute of Engineering and Technology , Junagadh</b> Diploma in CE 9.19 CGPA	Completed on 2024
• <b>LJ University, Ahmedabad</b> Artificial Intelligence and Machine learning 7.36 CGPA	Expected in 2027

## Skills

- Frontend : HTML ,CSS ,Tailwind/ Bootstrap
- Backend : Python ( Basic / Django / ML /DL )
- Tools : Git/GitHub, VS Code
- Other : Shopify

## Projects

- **Lost & Found System**  
A basic Lost & Found web app made using the MERN stack. Users can add lost items, view found items, and search through the list. React was used to make simple input forms and display data, Node-Express handled API requests, and MongoDB stored item details.
- **FlexiBrain (Using Django)**  
A basic Django project where I created simple pages, handled routing, and used templates. It helped me learn how Django works, how to manage views, and how to connect frontend with backend.
- **Contact Book (Basic Python)**  
A small program to save, search, update, and delete contacts. It uses simple functions, lists/dictionaries, and file handling basics.
- **Athletic Mall (Shopify Store)**  
A simple e-commerce store created using Shopify. In this project, I added products, managed collections, customized the theme layout, and arranged pages like Home, Products, and Contact. I also worked with basic settings such as navigation, product details, and store design.
